

## ISEV Workshop: Large Extracellular Vesicles Columbus, Ohio

March 4-5, 2024

Co-Chairs: Shaurya Prakash & Dolores Di Vizio  
IOC: Mona Batish, Charles Lai, Metka Lenassi, Eduardo Reategui, and Shannon Stott

## Sponsorship Opportunities

The **ISEV Large Extracellular Workshop** is aimed to define large EVs and deepen our knowledge about the methodologies for L-EV isolation and characterization, the mechanisms of biogenesis and cargo selection, to discuss challenges and to facilitate new technologies to better study and understand L-EVs. The outcomes of the workshop will be later shared with the wider EV community.

Short talks and round-table discussions will revolve around four main topics:

- **Topic 1: EV heterogeneity:** What are Large-EVs (L-EVs) and how do we study them?
- **Topic 2: L-EV Biogenesis:** How are L-EVs formed and what is the process of cargo selection and packaging of L-EVs?
- **Topic 3: L-EV functions:** What is the biological relevance of L-EVs?
- **Topic 4: L-EV Technology & Current Obstacles:** Where we are and what needs to be done to better study and understand L-EVs?

### To Sign Up

Review this prospectus for complete details, reach out to [contact@isev.org](mailto:contact@isev.org) with any questions, and when you are ready to sign up.

### Sponsorship Packages

Prices are listed in USD.

Benefit	Gold - \$4,500 <i>Limited Opportunities</i>	Silver - \$2000	Bronze - \$800
10 minute talk in the program	X	-	-
Table-top exhibit*	X	X	-
Complimentary registrations	2	1	-
Option to participate at the roundtable discussions	X	X	-
Commercial poster display**	X	X	X
Recognition in onsite program and on website	X	X	X
Onsite thank-you signage	X	X	X
Brochures/promotional material	X	X	X

\*Table and two chairs set in the exhibit area.

\*\*Poster board behind your table-top
